

Boat - 3

Learning Intentions

Students group living things based on observable features and distinguish them from non-living things.

Daradgee Specific Elaborations

This experience may require students to:

- recognise characteristics of aquatic animals (eg. fish, freshwater prawns, crocodiles) such as position of eyes, nostrils, ear openings and use of swimmerets, gills, nippers, fins
- recognise the range of different aquatic animals
- use simple explanations to communicate ideas
- represent observations and experiences through digital photography
