

Australian Curriculum

At Daradgee Environmental Education Centre, we place emphasis on sustainability as a priority for study that connects and relates relevant aspects of content across learning areas and subjects.

Cross-curriculum learning is fundamental to:

- understanding the ways social, economic and environmental systems interact to support and maintain human life
- appreciating and respecting the diversity of views and values that influence sustainable development
- participating critically and acting creatively in determining more sustainable ways of living.

Through the priority of Sustainability, students develop the knowledge, skills, values and world views necessary to contribute to more sustainable patterns of living.

Our programs - *Farm, Polly Creek, Boat* and *Snake Talk* incorporate the following organising ideas from the Sustainability Cross Curriculum Priority:

Systems

OI.2 All life forms, including human life, are connected through ecosystems on which they depend for their wellbeing and survival.

OI.3 Sustainable patterns of living rely on the interdependence of healthy social, economic and ecological systems.

Futures

OI.7 Actions for a more sustainable future reflect values of care, respect and responsibility, and require us to explore and understand environments.
